Human error is a major cause of accidents and disasters. In fact, it is estimated that human error is responsible for up to 90% of all accidents. This is a sobering statistic, and it is one that we should all be aware of.

There are many different factors that can contribute to human error. Some of these factors are within our control, while others are not. However, regardless of the cause, human error is a serious problem that can have devastating consequences.

In this book, we will explore the different design flaws and bad decisions that can lead to human error. We will also discuss ways to prevent human error and mitigate its effects.

Chapter 1: The Nature of Human Error

In this chapter, we will discuss the different types of human error. We will also explore the factors that can contribute to human error, and we will discuss the consequences of human error.

Chapter 2: Design Flaws That Can Lead to Human Error

In this chapter, we will discuss the different design flaws that can lead to human error. We will also provide examples of how these design flaws have contributed to accidents and disasters.

Chapter 3: Bad Decisions That Can Lead to Human Error

In this chapter, we will discuss the different bad decisions that can lead to human error. We will also provide examples of how these bad decisions have contributed to accidents and disasters.

Chapter 4: Preventing Human Error

In this chapter, we will discuss the different ways to prevent human error. We will also provide examples of how these methods have been used to successfully prevent accidents and disasters.

Chapter 5: Mitigating the Effects of Human Error

In this chapter, we will discuss the different ways to mitigate the effects of human error. We will also provide examples of how these methods have been used to successfully reduce the severity of accidents and disasters.

Human error is a serious problem, but it is one that can be prevented and mitigated. By understanding the different factors that can contribute to human error, and by taking steps to prevent and mitigate its effects, we can help to create a safer world for everyone.
