A Revolutionary Imperative for the 21st Century

In *Infomocracy*, Malka Older explores the profound implications of the information revolution for our society and politics. She argues that we are on the cusp of a new era, one in which information will be the primary source of power.

Older's vision of infomocracy is a radical departure from the current political system. In an infomocracy, citizens would have direct access to information and the ability to make decisions about how their government is run. This would lead to a more transparent, accountable, and responsive government.

Older's book is a must-read for anyone who wants to understand the future of democracy. She offers a compelling vision of a more just and equitable world, and she provides a roadmap for how we can get there.
